

Geographical Presence

First Milling Company has four main production plants in each of Jeddah, Al-Qassim, Tabuk, and Al-Hasa, thus covering a wide geographic scope of the Kingdom. This geographic presence and spread play an important and decisive role in its sales growth and the expansion and diversification of its customer base. Jeddah Plant has the largest storage capacity of silos with 120,000 tons of wheat, followed by Al-Qassim Plant with 60,000 tons, then Al-Hasa Plant with 30,000 tons, and finally Tabuk Plant with 10,000 tons.

The Company's sales are not limited to the locations of its main branches, as the Company's products are present in other regions through

sales and distribution warehouses belonging to the Company or its authorized distributors. Currently, the Company is benefiting from the recent decision allowing all milling companies to initiate exporting to other markets. The Company already started exporting to countries such as the UAE, Qatar, Kuwait, and Egypt among others. The contribution ratio of each geographic region in the Company's annual revenues differs. Jeddah Plant, which covers the Western and Southern Regions, acquired the biggest stake with a contribution ratio of 45% by the end of 2024G.

*The pre-mix plant is located in Jeddah Plant and has a capacity of 240 tons per day, as well as including 500 tons increased in capacity for Mill (C) and Mill (A) together, and 150 tons for Pesa Mill.

The Geographical Contribution by Region in the Company's Revenue in 2024
